

HOT TUB COLLECTION

BUILT FOR LIFE

quiet time, *fun time, anytime!*

Transform your backyard into an outdoor space that will revitalize your home, encourage time with family and friends and promote wellness. Of all the home improvement projects you could select, adding a hot tub is one of the most rewarding with year round use and wellness benefits.

Those Precious Moments

Watch your living and entertaining space expand as you use your hot tub in any season. View a brilliant sunrise, stargaze or conveniently entertain family and friends from the privacy of your own home. With packed calendars and busy schedules, it's easy to feel like family time is missing the quality you crave. The warm, swirling water of a hot tub provides the perfect opportunity to spark conversation, be playful and reconnect with family and loved ones. Feel more involved than ever before, by simply taking time to slow down, together.

When surrounded by all the comforts of home, it is easier than ever to treat yourself to rest and relaxation or gather everyone together for a night of fun!

With a simple turn of the UltraMassage™ Selector, you can choose the intensity of your massage in any seat by diverting the jet pump power, delivering a personalized experience.

sleep better. *feel better. be a better you.*

Whether it is diminishing the stresses of everyday life, relieving aching joints and stiff muscles or simply getting a better night's sleep, a soak in your PDC hot tub assures a healthier, happier you. Each spa features a variety of therapeutic jets, strategically positioned to target specific muscle groups.

Revive

Knead tired hamstring and calf muscles with a pulsating water action or let perfectly positioned hip jets soothe away the day's tension in a deep contoured therapy seat. From hip to toes, and everything in between, every PDC Spas® hot tub offers a full body massage that truly sweeps you off your feet.

Relax

All PDC Spas® models, unlike other brands, offer adjustable and interchangeable jet nozzles to customize your massage without ever leaving the hot tub! While relaxing in the warm, swirling water, with an easy twist of the jet, you can create the type of massage perfect for you! Intense pinpoint massage, soft and soothing relaxation, swirling relief for sore muscles and joints, at PDC, your choice of comfort is as unique as you.

Relieve

Soft air-filled pillows cradle your head and neck. Massaging neck and shoulder jets improve blood circulation, relieve headache pain and gently dissolve tension.

Rejuvenate

Like a soft fingertip Swedish massage, the PDC exclusive Air'assage™ design caresses every inch of your body for a complete feeling of relaxation. Unlike deep tissue action, the Luxury Series Air'assage™ delivers soft, soothing oxygen bubbles to boost skin cell rejuvenation and energy levels.

Invigorate

Oversized, powerful jetting delivers a most effective foot and lower leg massage. It is proven this type of treatment, known as reflexology, treats major organs and brings healing and balance into the whole body.

ingenuity *meets reliability.*

Spa ownership means different things to different people. Whether you want to improve your outdoor living space, escape from daily routines, rejuvenate your mind and body, improve your health and wellness, enjoy quality time with friends and family or treasure much needed time alone, PDC Spas® has a hot tub model ideal for you and your family.

Lifetime of Performance

At PDC Spas®, we are passionate about what we build. Our products are built smart, built strong and built to last by skilled craftsman right here in America. We purposely design our spas to deliver exceptional comfort, energy efficiency and high performance. PowerFlo™ filtration system design, Air'assage™ air therapy and TemperLok™ heat trapping systems set PDC hot tubs at a level of consistent flawless operation with distinct value and features.

Proof is in the Details

Every feature from the nighttime lighting aura to powerful innovative jetting to high tech control centers, we exceed your highest expectation in spa ownership. Our vision knows no bounds, evident in every body conscious contour, meticulously crafted with your comfort in mind.

Support with a Personal Touch

We are committed to stand behind our products and support our customers. You can count on a hot tub that is built to last, supported by comprehensive warranties and responsive customer service. No automation at PDC Spas®, only personal attention with our factory pros answering your every question.

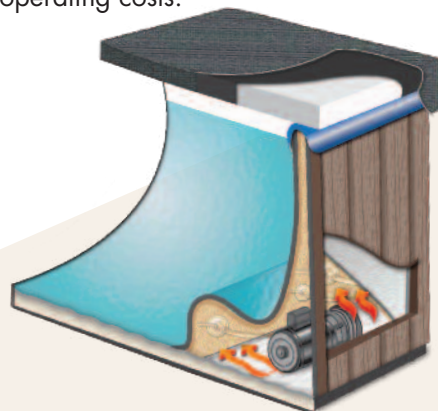

recycle. reuse. recirculate.

TemperLok™, a green-minded PDC Spas® innovation, ensures your hot tub is warm and ready in any season. Engineered to reduce heat loss, this exclusive design traps warm air from pump operation between insulated cabinet walls and the TemperBase™ floor creating a “thermos” effect. This recycled heat warms the shell within, reducing energy consumption and lowering your operating costs.

TemperLok™, a green-minded PDC Spas® innovation, recycles trapped warmed air from waste heat to efficiently keep your hot tub warm and ready in any season.

This PDC Spas® exclusive, no foam design makes our spas light in weight for easy installation and more efficient, economical servicing. Cabinet sidewalls are quickly removed to access equipment and easily replaced after servicing with no compromise to the TemperLok™ design. Enjoy your PDC spa for years to come, knowing confidently that it is maintained at the same high level of efficiency as the day it was made.

Use Less, Save More

Our product line meets or exceeds the industry energy standards in compliance with the strict California Energy Commission (CEC) Title 20 energy use testing. Our TemperLok™ insulation design, thermal locking cover, high power - low energy pumps, LED lighting and programmable digital controls make our hot tubs the proven economical choice.

www.pdcspas.com/performance/energy-efficiency

ACCULOK
Hot • Tub • Covers

Lock in Heat

A PDC exclusive, AccuLok™ hot tub covers feature breakthrough technology. Our innovative hem design prevents heat escape for significant energy savings and a proprietary core material resists water absorption for a cover that remains lightweight and easy to use. Safety locks, 7 year warranty and ASTM approved.

naturally clean. *naturally carefree.*

Clean, clear water is simple with our proven effective PowerFlo™ filtration system. Our unique pressurized filtration design works in conjunction with the jet pumps; powerfully pushing dirty water through an easy to reach, out of sight pleated filter. Used water and debris is captured through surface and floor suctions, filtering your spa from top to bottom. Reliable and virtually self-maintaining, all you see is polished, crystal clean water returned to your hot tub. No muss, no fuss.

Nature's Purifier, Ozone

The PDC EverPure™ ozone system produces pure ozone, nature's powerful oxidizer continuously destroying organic and inorganic contaminants instantly. The EverPure system is cleansing your hot tub water whenever the pump is filtering, is completely silent and costs pennies a day to operate. Ozone is environmentally safe breaking down to pure oxygen after its work is done. Your spa water is scrubbed clean with PowerFlo filtration, combined with EverPure ozone, and returned sanitized through the jetting system. All you are left with is purified spa water and a clean, "after rain" fresh scent.

Know with Certainty

Exclusive to PDC Spas®, our EverLite™ indicator lets you know your spa is clean and inviting. A quick glance at the cabinet mounted light will assure you the EverPure™ ozone is at work keeping your hot tub sanitized and pure.

Less Chemicals, More Clean

The EverPure2™ system is a powerful combination of ozone and UVC proven to deliver the highest level of sanitation. This exclusive purification system offers the same oxidation process as is widely used in the treatment of drinking water sterilization in healthcare environments. The cabinet mounted EverLite™ sight glass assures the system is operating properly, putting your mind at ease.

surround *in the glow.*

Light up the night for your much deserved after dark relaxation with the PDC Spas® lighting systems. Choose a slow rotating prism of color or select your favorite tone to perfect your evening retreat in any PDC hot tub model.

MotionGlow™ Lighting

Set the warm swirling water aglow with soft LED color. Choose a slow rotating prism of tones or your favorite color to best match your nighttime relaxation mood. Standard feature on all PDC Spa hot tub models.

Premium Series Prism Lighting™

Entertain your senses with a collection of soft glowing lights; MotionGlow™, six LED underwater pinlights and two lit cascading waterspouts. Choose from an array of striking colors to heighten your Premium Series spa enjoyment.

Luxury Series Halo Lighting™

All Luxury Series hot tub models enhance your nighttime relaxation with up to twelve LED underwater pinlights and three lit, cascading waterspouts for a tranquil sound and soothing ambiance.

Allure2™ Lighting Option

The optimum in hot tub lighting, this optional Luxury Series feature adds LED lit cup holders, air controls, and UltraMassage™ controls setting the topside aglow with color. Four brilliant LED corner sconces wrap your Luxury spa model in warm light completing your evening relaxation experience.

Spectrum Lighting™

The ultimate of nighttime relaxation is offered with the newly introduced Luxury Series Spectrum Lighting™ package. Up to 91 points of LED lighting from cabinet sconces, UltraMassage™ Selectors, air controls, cup holders, underwater pins, cascading spouts and hydrotherapy jets delivers excellence in spa lighting.

stay in control, *near and far.*

The eye-catching SmartTouch™ touch screen control center lets you experience your Luxury Series spa in a fun, familiar way, much like that of an iPad® or tablet. Colorful, interactive display icons make operation and settings of your spa simple, even with wet fingers. All of your main spa functions are conveniently displayed on the opening screen for quick, one-touch menu driven operation.

Anywhere there's an internet connection, there's control at your fingertips. Turn any feature on and off, adjust temperature, change filtration modes, set customized themes – all controlled from the WAVE™ wireless control and an app on your smart phone or tablet.

music *to your ears.*

Our SoundStream™ audio system enhances your spa experience with marine-grade speakers and transducers delivering streaming music with Bluetooth® wireless technology. The SoundStream system includes an internally mounted subwoofer enhancing low range bass and volume. Finger-touch operation at spa side with our SmartTouch™ and ProView™ control centers.

USA made, *from start to finish.*

Our attention to detail, commitment to the American worker and respect for our environment makes PDC stand above other spa manufacturers. Production begins with durable cast acrylic sheet in your choice of rich color. Units are then backed with multiple layers of hand-rolled fiberglass and non-filled resins, for a spa that is both beautiful and exceptionally strong. So strong that every PDC spa shell can actually stand on its own. Other manufacturers rely on framing for hot tub shell support. That support could be metal, wood or even foam. At PDC we build our spas to support themselves, choosing not to cut corners during the production process. PDC is so confident in our construction, we warrant up to 35 years of uncompromised structural integrity. Our virtually carefree PermaWood™ cabinet is for looks and good looks only, not to support or strengthen the spa shell.

Proud Legacy

The focus at PDC is to build a product with long-lasting performance and dependability; a durable product engineered with customer satisfaction in mind. Thousands of PDC customers, having owned their hot tub for year after year, are confident this fine product will continue to perform and exceed their home relaxation expectations for years to come.

Personal Touch

Over the years, PDC has built a reputation on quality products and standing behind what we sell. Our factory representatives and staff go above and beyond to personally assure customer satisfaction. PDC employees are dedicated and experienced, and it shows.

A woman is relaxing in a large, rectangular hot tub with a black frame and grey panels. The hot tub is situated on a stone patio. The surrounding area is landscaped with gravel, various plants, and a small table with chairs in the background. The hot tub has a black top with a blue interior and several jets. The woman is wearing a blue and black swimsuit and is lying back, enjoying the water. The patio is made of large, light-colored stone tiles. There are several potted plants around the hot tub, including a large one with pink flowers and a smaller one with yellow flowers. The overall scene is a peaceful outdoor living space.

"Our spa is the focal point of our outdoor living space all year long and we are always getting compliments. We are making great memories spending crazy family time together with our kids and grandkids or just relaxing alone on a quiet evening. No matter what you want, there is a spa that will fit your needs and allow the massaging jets to take your body's aches and pains of the day away. We are looking forward to enjoying our new spa for another 15 years, or more."

R.S. - Pennsylvania.
